Danish Design

BAKOBA is a Danish-designed construction toy that stimulates creativity, imagination and motor skills. BAKOBA® enables children to explore, discover and innovate while playing. BAKOBA® is made from a soft, flexible and very durable foam material. The blocks make no noise when played with, creating a comfortable playing environment. You can even wash it in the washing machine at 40°C (110°F), on a gentle wash cycle, ensuring a high level of hygiene. Uniquely, BAKOBA® is combinable with building

bricks, via the “connector-piece” included in the boxes, creating infinite possibilities. Moreover, BAKOBA® floats on water and can therefore be used in the bathtub or brought outside, where kids can experiment and play with their constructions in water areas.

We recommend BAKOBA® to kids from 3 to 9 years old. The youngest can build simple constructions, perhaps together with teachers and parents, while the older kids can build more advanced and combine with their building bricks.

Bring BAKOBA to the **bathtub**

Stimulates
creativity

Play is serious.

It is fundamentally important for building the skills we need to become independent, creative, problem-solving adults.

This is why, we have designed BAKOBA. To keep children playing. For hours and hours and years to come.

We have constructed each element, so it can be combined in unlimited ways. Made the materials flexible and sturdy, so you can twist and turn them into anything you can imagine.

Made the quality extremely high, so once you've built something,

it will stay together, and you can play without fear of anything breaking or falling apart. Play indoors as well as outdoors. The light BAKOBA materials float, so they are perfect for the pool, the tub and easy to clean in the washing machine.

BAKOBA is constructed to keep children playing from they are 3 to grown up. Our sets are made, to continuously build motor skills and ignite imagination. And because imagination knows no borders, we've designed connectors that allow you to combine BAKOBA with the building bricks you already have at home. Because we do not believe toys should set limits.

We believe they should inspire to endless play.
