love wood & play...

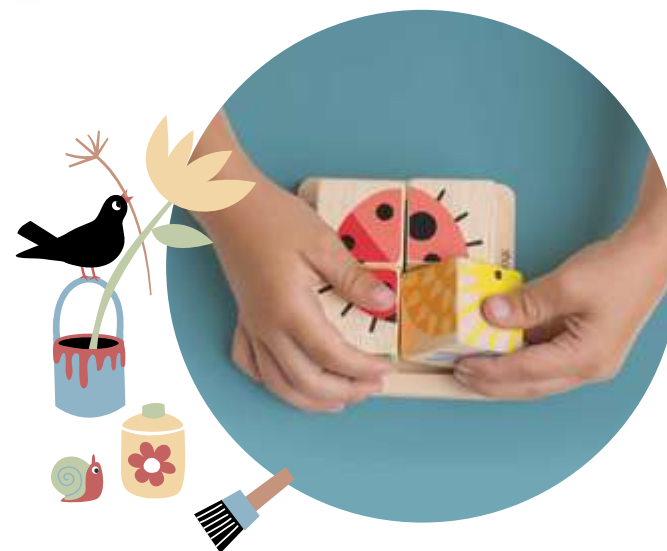

Toys for this generation, trees for the next

We are deeply committed to protecting Indonesia's natural resources and only work with reclaimed rubberwood, a by-product of the latex industry, grown on plantations, not forests, ensuring that our wood is completely sustainable. In addition, for every reclaimed tree we use, in partnership with the Indonesian government, we plant a new tree, driving ahead of the cycle of regeneration. This is SVLK Indonesian Legal Wood.

Tested, Tested, Tested

We know toys are fun to play with, but we have to be sure they are completely safe and durable. We use non-toxic paints, making our toys completely safe and kind to the planet. All of our toy products meet the European, American, Australian and New Zealand standard safety of toys according to EN71, ASTM and AS/NZS ISO.

Heart and home

Our family-run factory operates with high standards of training, wellbeing and respect and provides dependable employment for hundreds of local villagers. With over 30 years of experience we have become one of the world leaders in wooden toy manufacturing. We have been awarded the ICTI and the ISO 9001 seal of approval and strive to maintain ethically high standards throughout our organisation. In addition, regular audits take place by the ICTI, ensuring the highest of social and working standards.

Tender loving toys

We create exciting worlds of imaginative wooden toys, that are made to last with a lifetime of love. We strive to continuously develop and grow our charmingly quirky products, that are engaging, tirelessly entertaining, and perfect for little hands. While we love to be educational through play, we encourage every child to be authentic so that they can grow with confidence, and have fun at the same time!

We are family

We love children, and the worlds that they create, and we love wood and play. All our products are evocative of our own childhood and watching our children explore the world around them has truly inspired our design thinking. From baby, through to nursery and onto school, we design toys that can be engaged by the whole family and passed onto the next generation. Our design team in London are drawing and imagining beautiful new products every day, which are then turned into endearing wooden toys by our talented sample team. They are then refined to reach the highest standards of durability, play value, and safety.

The human touch

From raw wood to the finished product, every single stage of production happens under the same roof in Indonesia. Once each toy has been hand-painted, assembled and checked, it is wrapped in paper and packaged in recycled cardboard. We care a lot about being as sustainable to our lovely planet as we can be, and we are close to eliminating single-use plastic in all our packaging.

Kitchens and Cafés

Pretend play sets for mini chefs wanting to set up their very own kitchen or café.
Add accessories to build a range of wooden play food, from vegetables to ice creams!

ROSEWOOD COTTAGE (1)

The cutest woodland cottage you ever did see. With a rose coloured gabled roof, opening front doors and a removable back panel, this little house can be carried to be played with anywhere. Decorated on all sides with beautiful wild flowers, and two cut out windows which allow the flower stems to run through creating a magical meadow look. The back panel lies flat to become a garden, on to which can be placed a pretty swing, 2 flowers, and a toadstool. We have included a wood burning stove, flower table, 2 button stools, a toadstool lamp and a side table. Tuck Bud up in his leafy fabric bed, or push Corny on the swing while mummy Flora and Daddy Joey watch the stars go by.

SECRET MEADOW SHEPHERD'S HUT (1)

A wonderful addition to our Merrywood Tales collection. This shepherd's hut is the perfect glamping staycation for our new family of mice. They have borrowed some human-sized trinkets to use as essential furniture in their hut. A teacup makes a perfect shower for a little mouse. Spools of old thread make for chairs to sit on, a tin of sardines creates the comfort of a baby cot and tucks neatly underneath a simple bed inside. A pimento tin doubles up as a small wood-burning stove. A safety pin becomes a towel rack and an old watch provides the time of day. Little stairs can be clipped to the front door to help them with the step-down. All can be accessed by removing the roof, or through the little doors at the front.
