2026

Hello!

Enter a world where everything is possible. A place full of color and creativity. This is APLI, **«The sticker factory»**.

We began in 1932, manufacturing labels, thousands of labels in multitudes of shapes, colors, textures, materials, sizes, etc. Year after year, our catalogue grew.

After many years working with **schools and teachers,** designing materials and inventing products that facilitate and support educational activities, we created APLI Kids.

Today we are present in:

80

Countries where we distribute our products

5

Production plants

6

Subsidiaries

With APLI Kids, our intention is for kids to learn while they enjoy playing with our **games, toys and materials**. Bringing out the artist, mathematician, astronaut or writer that is in them.

Welcome to APLI Kids!

Playing is essential for growing

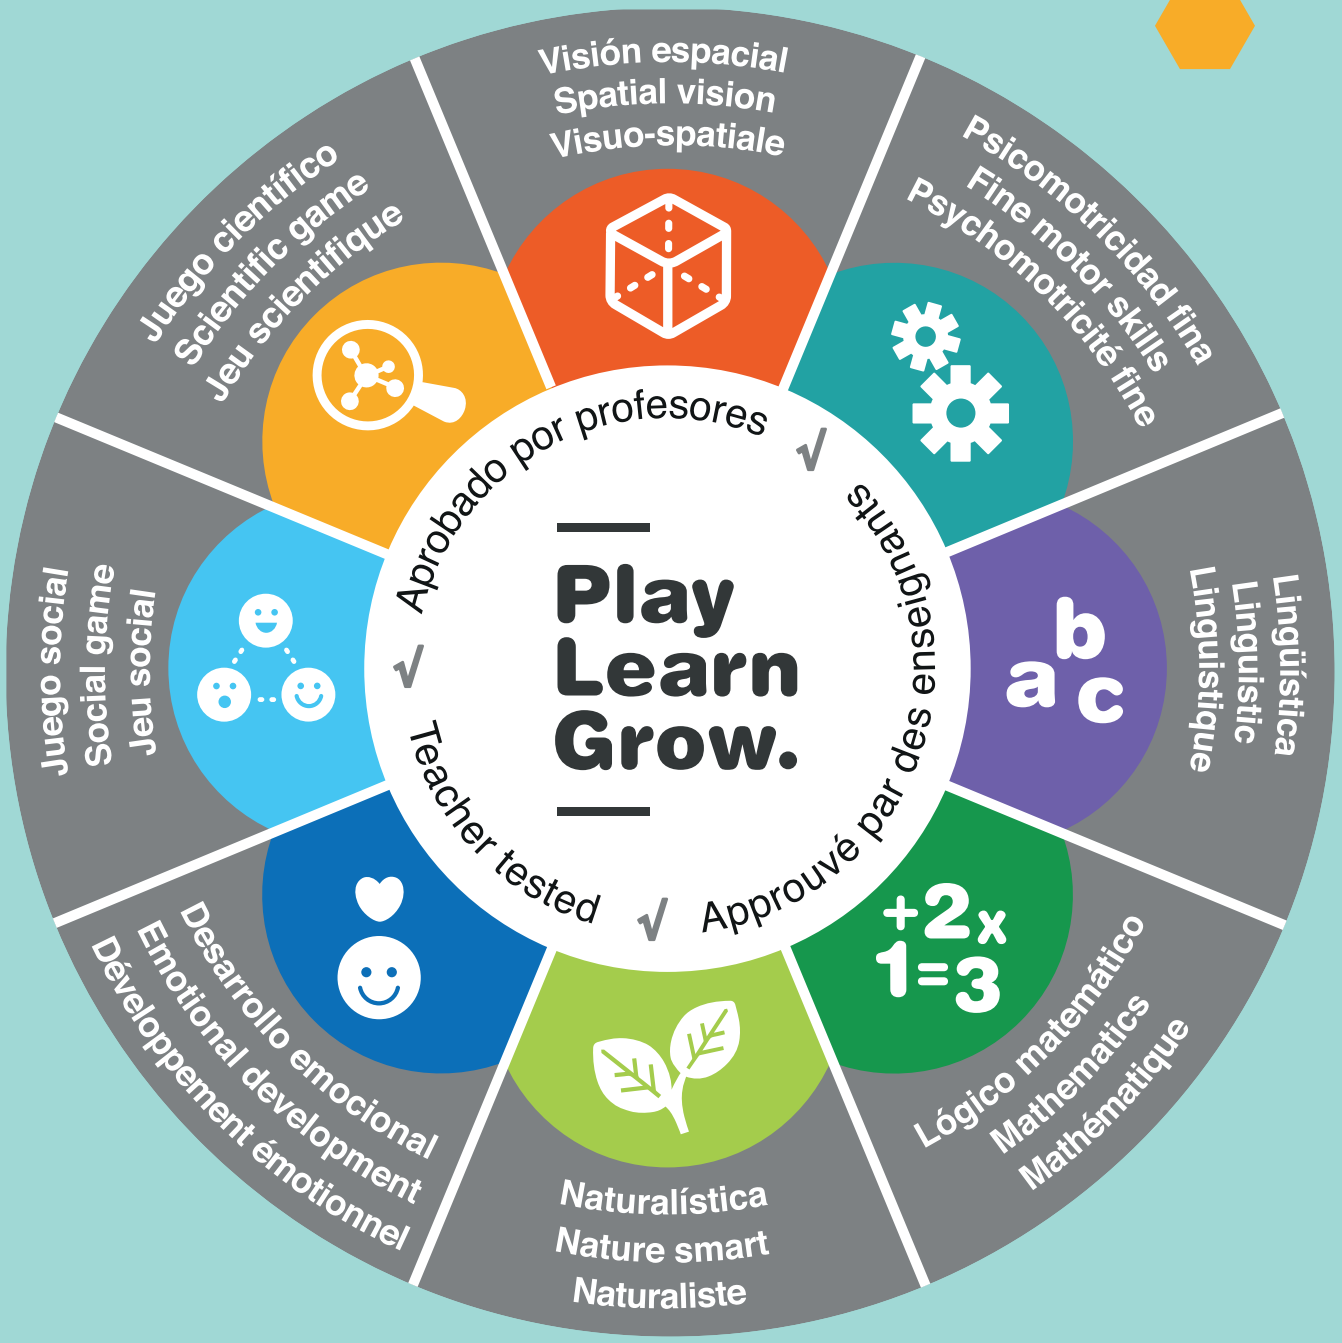

At APLI Kids we want the little ones to grow up playing.

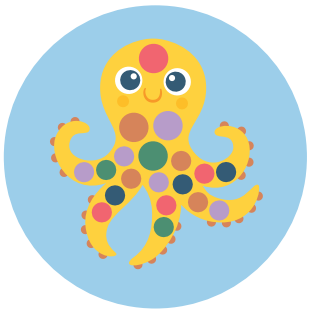

By playing, the child **stimulates their multiple intelligences**. Also learns to be autonomous and to interact with the world, acquiring an emotional and affective balance.

APLI Kids educational games encourage the development of cognitive functions, motivate social behavior and promote the acquisition of habits and values.

To devise our games, we collaborate with **professionals in the educational field and child pedagogy specialists**, who guarantee the appropriate use of the games and adapt them for each age.

APLI Kids games are based on the multiple intelligences identified and defined by the American psychologist Howard Gardner in his ***"Theory of multiple intelligences"***.

CAPAS DE LA TIERRA
La Tierra está compuesta por
Varias CAPAS que se superponen
e interactúan, generando terremotos,
volcanes y el campo magnético. Esta
dinámica interna ha formado y sigue
transformando nuestro planeta a lo largo
de millones de años.
CORTEZA OCEÁNICA CONTINENTAL
La corteza oceánica, delgada y basáltica, cubre
los fondos marinos. La corteza continental, más
gruesa y variada (granítica, rocas sedimentarias y
metamórficas), forma los continentes.
MANTO SUPERIOR
Formado por rocas muy calientes y pesadas,
especialmente peridotita. Cerca de la superficie, estas
rocas son duras, pero a medida que profundizamos,
se vuelven más blandas y pegajosas debido al calor.
MANTO INFERIOR
A pesar de las altas temperaturas que podrían fundir
la mayoría de las rocas, la enorme presión
ejercida por las capas superiores mantiene las rocas
en estado sólido. Es roca en hierro y silicatos.
NÚCLEO EXTERNO
Mar de hierro líquido que cubre al núcleo interno
sólido. Sus movimientos generan el campo
magnético terrestre.
NÚCLEO INTERNO
Esfera metálica sólida, compuesta principalmente
de hierro, situada en el centro de la Tierra.
Su temperatura es comparable a la superficie del Sol
