

# Catalogue 2026

Have fun while learning!

## Compliance

We ensure compliance with the European Standards (EN71), American Standards (ASTM F963) and other legal grounds whenever these are applicable, such as REACH, CLP or Cosmetics. During their development, all products are thoroughly scrutinized to ensure their complete safety while maintaining their play value.

## STEAM

SCIENCE TECHNOLOGY ENGINEERING ARTS MATHEMATICS

STEAM toys help kids gain knowledge in these five areas by stimulating their skills while they are playing. Science4you's toys like science kits, puzzles, and building toys are perfect tools to increase kids' logical and critical thinking, stimulate their curiosity and become more aware of their surroundings.

## Interactive educational book

Science4you toys come with an educational book that includes instructions developed by teachers and scientists, which engages kids to learn while playing. The educational book is developed in accordance to the key stages and the toy's recommended age of use. Science4you embraced the transition from paper educational books into a more interactive and fun digital format.
